

Database and Data Modeling Concepts

Who I am: Joseph Gohlke (Ben's dad)

Education: UCF, BS Computer Science

Experience: almost 30 years in industry

- 10+ years - Telephone Billing, mostly writing DB access jobs
- 5 years - other
- 15 years – DOD, Military simulation

Database and Data Modeling Concepts

Why have a Database?

- *Data Persistence*
- *Data Integrity*
 - *Transaction Scope (Atomic Transactions)*
 - *Commit*
 - *Rollback (bank – money transfer from account to account)*
- *Locking/Semaphores*
- *Multi-user data access/update*

Database and Data Modeling Concepts

- *What is a database?*
 - *Files*
 - *Running Application*
- *What is a database made up of:*
 - *Schema – Owner*
 - *Database Objects*
 - *Tables*
 - *Columns*
 - *Unique Constraints*
 - *Primary Keys*
 - *Foreign Keys, No orphans*
 - *Creating a child with no parent*
 - *Deleting a parent that has children*
 - *Indexes – mostly for Performance*

Database and Data Modeling Concepts

Data Modeling

Where to put all
the bits?

Key

<i>Name</i>	<i>Sex</i>	<i>Eye Color</i>	<i>Hair Color</i>	<i>Height</i>
Joseph Gohlke	Male	Blue	Gray	6'1"

Phone Number: 407-730-3483 ?

Database and Data Modeling Concepts

1st Normal Form – Domain of the attribute is atomic and each value is only 1 item

Each attribute is dependent on the full key of the table.

No attribute is dependent on a subset of the full table key.

Master Record – Iron Yard Guest Contact

<i>Name</i>	<i>Phone Number</i>
Joseph Gohlke	407-730-3483

Key

Attribute

For a phone number, 10-digits in the format 3-3-4. Database rules enforce structure.

Attribute is “atomic”...meaning it is only 1 thing, it is not divisible

Database and Data Modeling Concepts

1st Normal Form Cont'

If Joe gets some office space, has a home office and a cell phone, then where to put the other phone numbers?

407-730-3483 407-205-1234 407-205-3241

<i>Name</i>	<i>Phone Numbers</i>
Joseph Gohlke	407-730-3483, 407-205-1234, 407-205-3241

Is the attribute value atomic?

Database and Data Modeling Concepts

1st Normal Form Cont'

<i>Name</i>	<i>Phone Numbers</i>
Joseph Gohlke	407-730-3483, 407-205-1234, 407-205-3241
Ben Gohlke	(407)730-7878;407-123-5643
John Smith	302.345.6521,201.593.8429,506.987.6532
Locksmith	888-POP-LOCK
Jane Smith	4078647483,,4076845385

Not like this.

Why?

You tell me.

Who wants to write a program to find the business phone number?

Database and Data Modeling Concepts

1st Normal Form Cont'

Key

<i>Name</i>	<i>Phone Number Type</i>	<i>Phone Number</i>
Joseph Gohlke	Home	407-730-3483
Joseph Gohlke	Work	407-205-1234
Joseph Gohlke	Mobile	407-205-3241
Locksmith	Work	888-767-5625
Jane Smith	Mobile	407-864-7483

Like this.

The attribute is dependent on the full key of the row. The values are atomic.

Database and Data Modeling Concepts

2nd Normal Form

- non-prime attributes not repeated***
- Plus 1 NF***

*Parent Record –
Iron Yard Guest
Guest Lecturers*

<i>Name</i>	<i>Sex</i>	<i>Eye Color</i>	<i>Hair Color</i>	<i>Height</i>
Joseph Gohlke	Male	Blue	Gray	6'1"

*Child Record
– Iron Yard
Guest Contact
- Phone
Numbers*

<i>Name</i>	<i>Phone Number Type</i>	<i>Phone Number</i>
Joseph Gohlke	Mobile	407-730-3483
Joseph Gohlke	Office	407-123-4567

Database and Data Modeling Concepts

2nd Normal Form – non-prime attributes not repeated (plus 1st NF)

<i>Name</i>	<i>Sex</i>	<i>Eye Color</i>	<i>Hair Color</i>	<i>Height</i>
Joseph Gohlke	Male	Blue	Gray	6'1"

Where to put a nickname like "Joe"?

<i>Name</i>	<i>Phone Number Type</i>	<i>Phone Number</i>
Joseph Gohlke	Mobile	407-730-3483
Joseph Gohlke	Office	407-123-4567

Database and Data Modeling Concepts

2nd Normal Form – non-prime attributes not repeated (plus 1st NF)

Like this?

<i>Name</i>	<i>Phone Number Type</i>	<i>Phone Number</i>	<i>Nickname</i>
Joseph Gohlke	Mobile	407-730-3483	Joe
Joseph Gohlke	Office	407-123-4567	Joe

Is the attribute value (non-prime) repeated?

Database and Data Modeling Concepts

2nd Normal Form – non-prime attributes not repeated (plus 1st NF)

Like this instead:

Master Record – Iron Yard Guest Contact

<i>Key</i>	<i>Sex</i>	<i>Eye Color</i>	<i>Hair Color</i>	<i>Height</i>	<i>Nickname</i>
Joseph Gohlke	Male	Blue	Gray	6'1"	Joe

Database and Data Modeling Concepts

3rd Normal Form

- Attributes are related to key***
- No transitive dependencies***
- Plus 2nd NF***

A “transitive dependency” is a value that has a dependent relationship to another value and that value is related to the key.

Database and Data Modeling Concepts

3rd Normal Form cont'

Attributes are related to key, No transitive dependencies (plus 2nd NF)

<i>Class Code</i>	<i>Class Name</i>
DB1001	Database Concepts
DB1002	Data Modeling

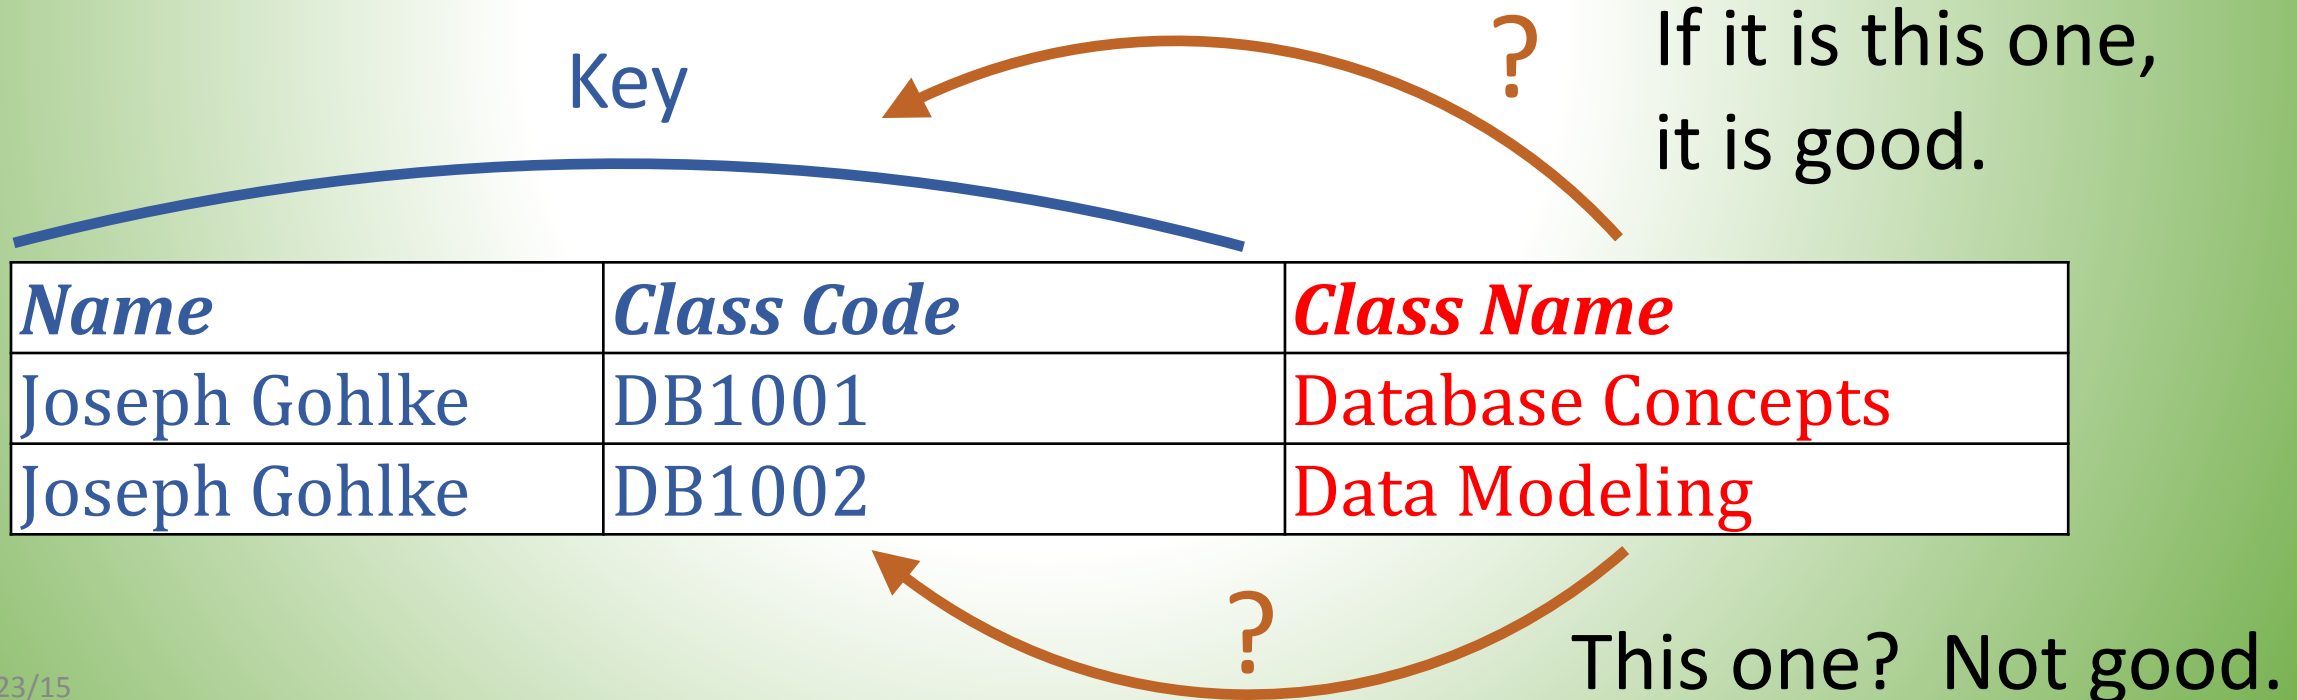

Where to put a guest contact lectures?

Database and Data Modeling Concepts

3rd Normal Form cont'

Attributes are related to key, No transitive dependencies (plus 2nd NF)

Which one is the dependency?

Database and Data Modeling Concepts

3rd Normal Form Cont'

Child Record
